

STOHLQUIST

2025 BUYERS GUIDE

STOHLQUIST
YOUR
CURRENT
IS
CALLING

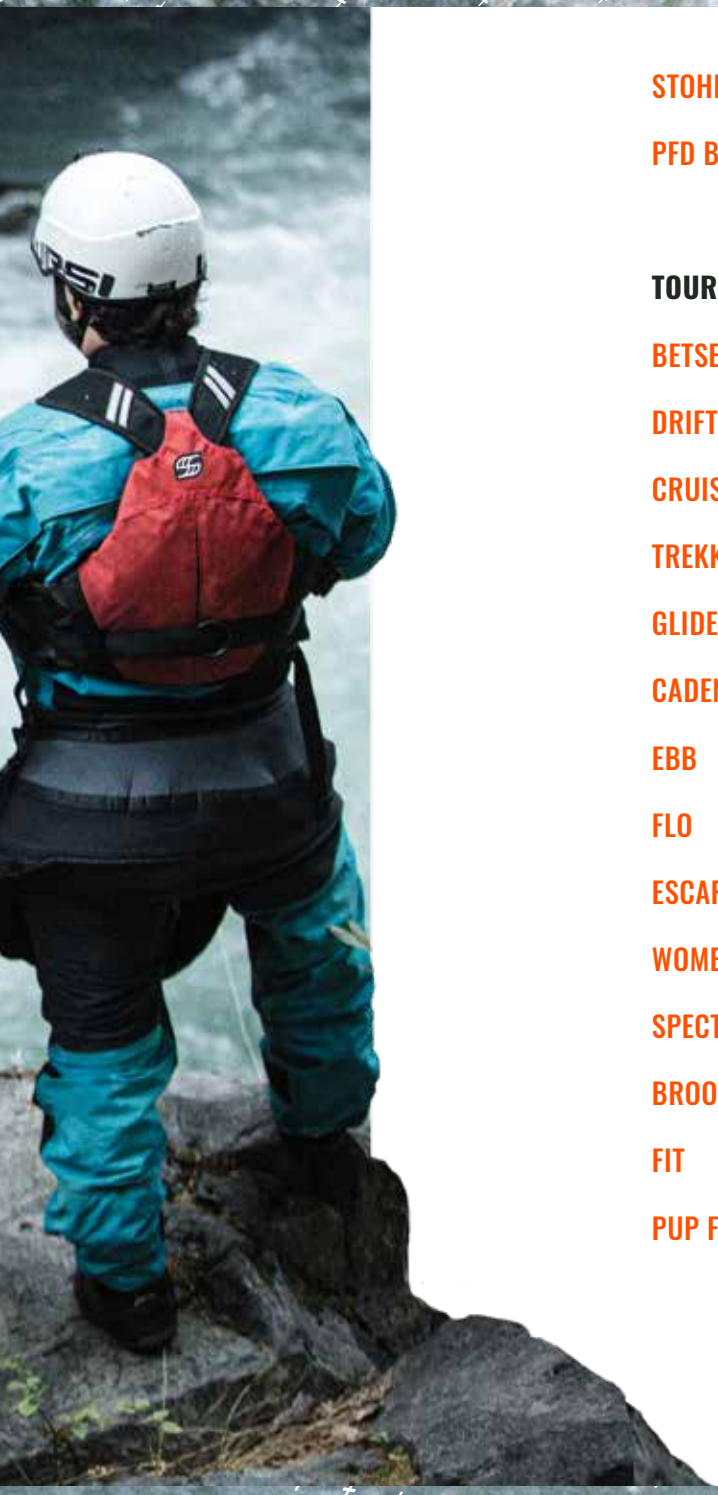

EQUIPPING PADDLERS SINCE 1977.

Built by paddlers for paddlers, Stohlquist is focused on creating functional, quality gear that empowers people to safely explore our waterways and push the limits of their adventure.

Our PFDs are crafted to the highest standards of comfort, innovative fit, and function to hold you up and get out of your way.

All so the current can take you where you want to go.

STOHLQUIST FIT SYSTEM

THE STOHLQUIST DIFFERENCE

Contoured for Real People*

Stohlquist PFDs with TruSize are uniquely designed to fit every body from petite to XXL across men, women, kids, and dogs.

STOHLQUIST FIT SYSTEM

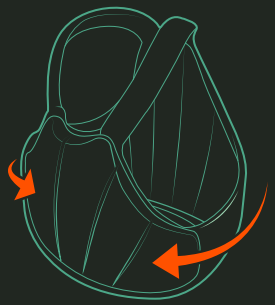

TECHNOLOGICAL PILLARS

TRUSIZE

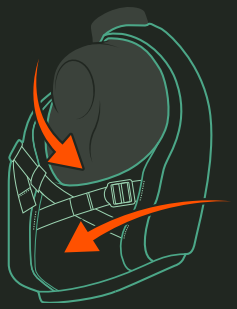

Right-size foam chassis and strap lengths that are unique across sizes

WRAPTURE SHAPED TORSO

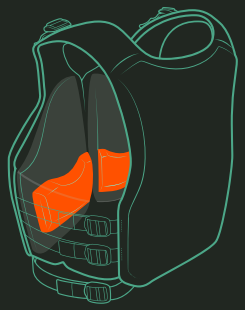

Ergonomically designed foam that contours to the natural shape of the body, allowing for a snug, secure and comfortable fit that doesn't restrict breathing.

CROSS-CHEST CINCH

Innovative strap system that anchors the PFD in place and eliminates ride-up and chafing on your underarms.

WOMEN'S FIT

Specifically designed for women with comfortably sculpted interior foam cups.

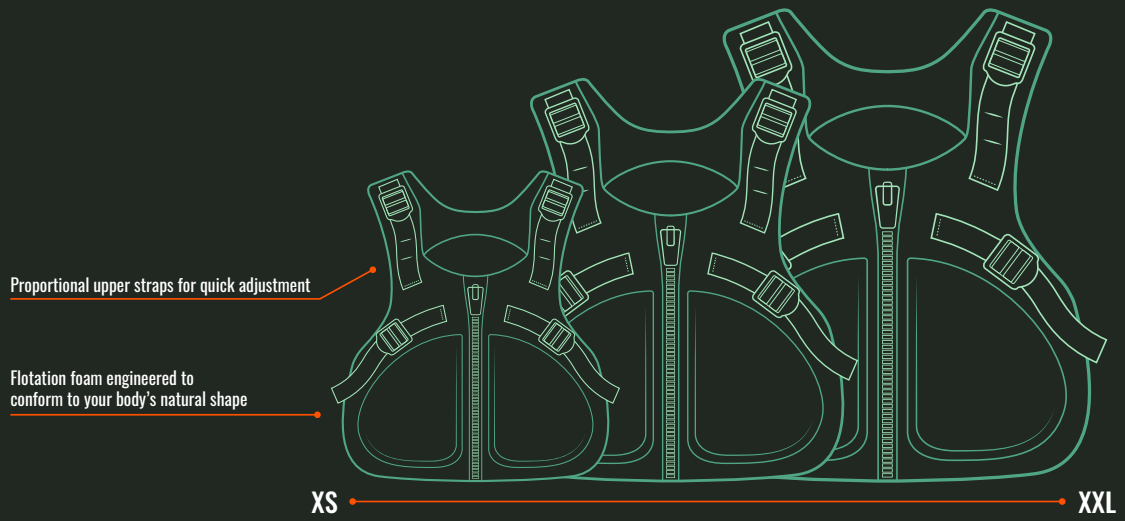

STOHLQUIST FIT SYSTEM

SCULPTED FIT

Stohlquist has pioneered slim, sculpted, cinched fits for all forms with our industry leading Fit System.

- Tailor-made dimensions specifically crafted for every sized paddler
- Each size methodically fine-tunes the chassis (flotation foam), straps and seams to provide the ideal buoyancy and fit
- Engineered for a customized and comfortable fit

Countoured Shape. Scaled Proportions. Easy Adjustment.

STOHLQUIST FIT SYSTEM

TRUSIZE

TRUSIZE

TruSize provides the correct chassis dimensions with varying amounts of flotation foam for every size paddler to ensure the most comfortable fit and the right amount of buoyancy.

Other manufacturer's simply change the length of their straps without adjusting the dimensions of the flotation foam creating a bulky, uncomfortable fit.

STOHLQUIST

= foam body sizes

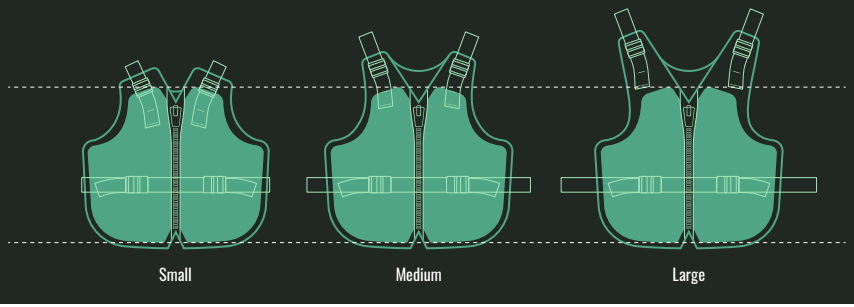

Various foam body sizes & adjustable straps

VS

OTHER BRANDS

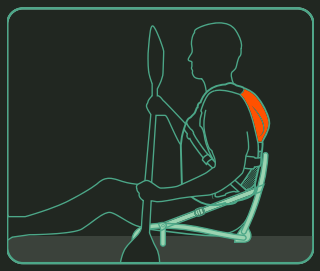

Adjustable straps only

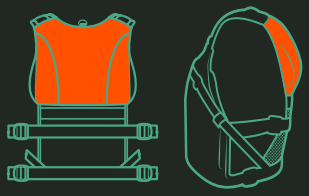

PFD BACK STYLES

YOUR CHOICE OF FLOAT, YOUR CHOICE OF BACK

Mesh-Back

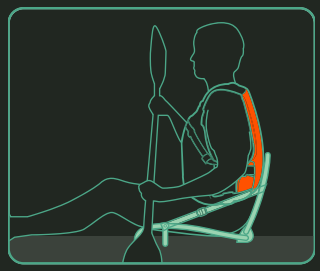

Mesh-Backs are designed to accommodate the taller seat backs which are becoming more common in recreational fishing kayaks and canoes. The newly crafted design avoids interference with even the tallest of seat backs, thanks to the increased height of the mesh back panel and the carefully sculpted and contoured edges of the back foam elements.

This also eliminates any edges that often get hung up on the seat backs, so you can simply enjoy the ease of paddling in comfort.

Best used with:
Canoeing, Fishing, Recreational, Touring

Thin-Back

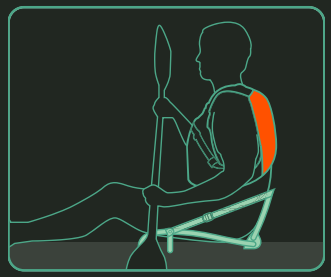

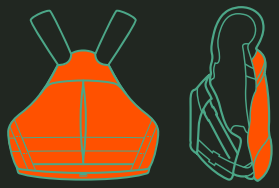

Thinner back panel style PFDs allows for a more natural sitting posture on seat backs of any height or style. By spreading the flotation elements over a wider area and decreasing the thickness in the back panel, the thin back design creates less bulk and helps avoid interference when paddling.

Best used with:
Sit-On-Top Kayaks, Fishing, Recreational, Touring

Standard-Back

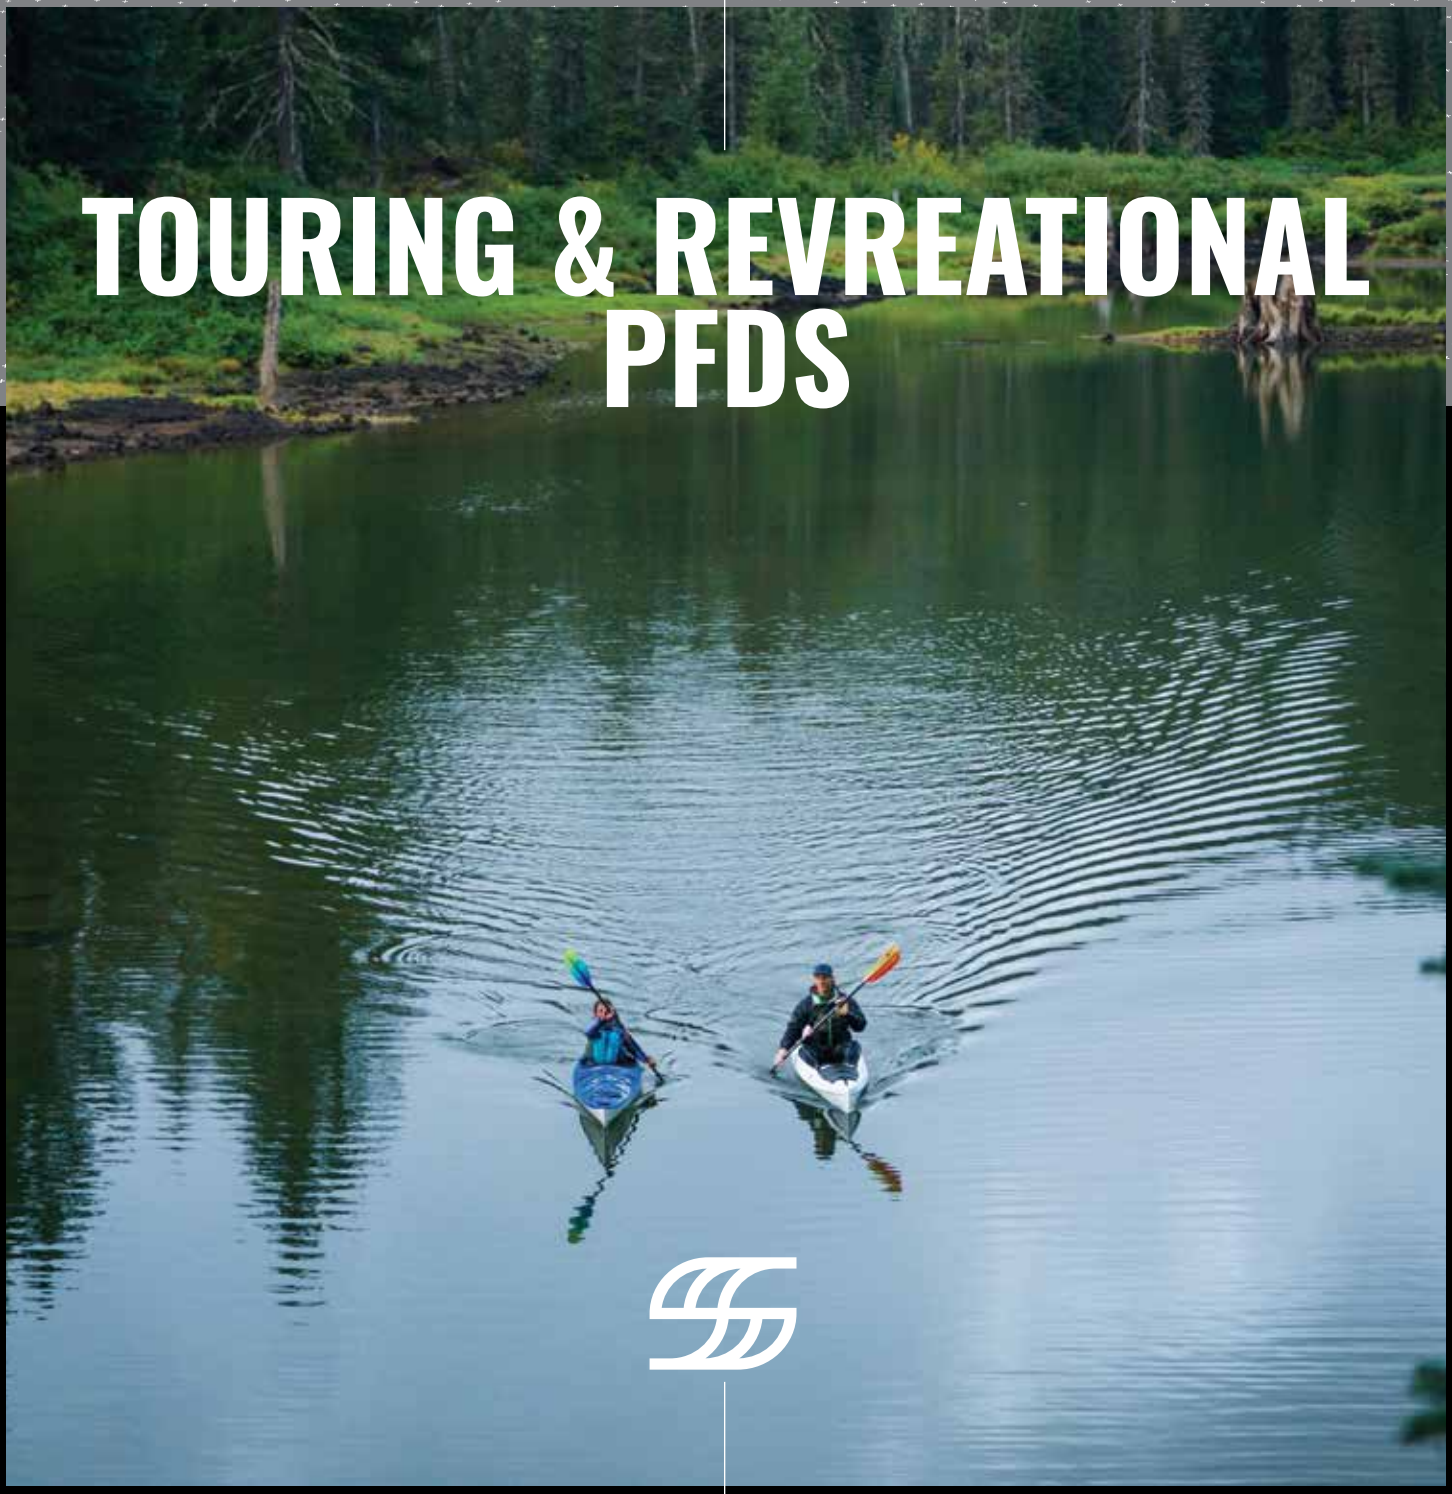

Standard-back PFDs are the more traditional style paddling jacket and are designed to work with boats without a seatback. With a lower profile than a mesh or thin-backed PFD, the standard-back design fits well with sprayskirts.

Best used with:
Whitewater Boats, Sea Kayaks, Rafts, Canoes

TOURING & REVREATIONAL PFDS

BETSEA

Gray

Flame

Cyan Blue

FEATURES:

- TruSize creates a better, more appropriate fit for a wider range of users
- Built-in contoured supportive inner cups wrap rather than crush
- Ergonomic WRAPTURE™ shaped torso
- Two large zippered pockets for easy accessibility & storage
- Lined hand warmer pockets
- Reinforced eyelets on front for accessory attachment
- Mounting loops on back for hydration bladder or accessories
- Ventilated shoulder and lumbar pads
- Adjustable shoulder straps
- Cross-chest cinch harness eliminates ride-up
- #10 YKK front zip entry
- 4-way accessory lash tabs located on chest and back shoulder
- 3M™ reflective trim on both front and back
- Harmonized (US Coast Guard & Transport Canada) approval

PUP FLOAT DELUXE

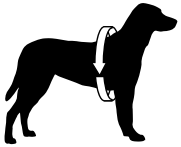

Blue

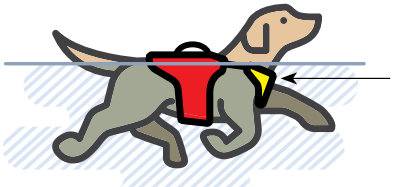

Mango

FEATURES:

- Pup-Right™ chest flotation panel provides more buoyancy under the dog's chest, which results in a safer swimming position
- Easy to grab handle for quick rescues or retrievals
- Multiple reflective accents for low-light visibility while in or out of the water
- Compact design keeps flotation forward on the dog, and helps improve mobility
- Two quick-release buckles allow for quick donning & doffing
- Quick drying nylon shell is easy to clean
- Elastic loops help retain excess webbing straps
- Contact information area on vest interior

Sizing is based around the widest part of the rib cage

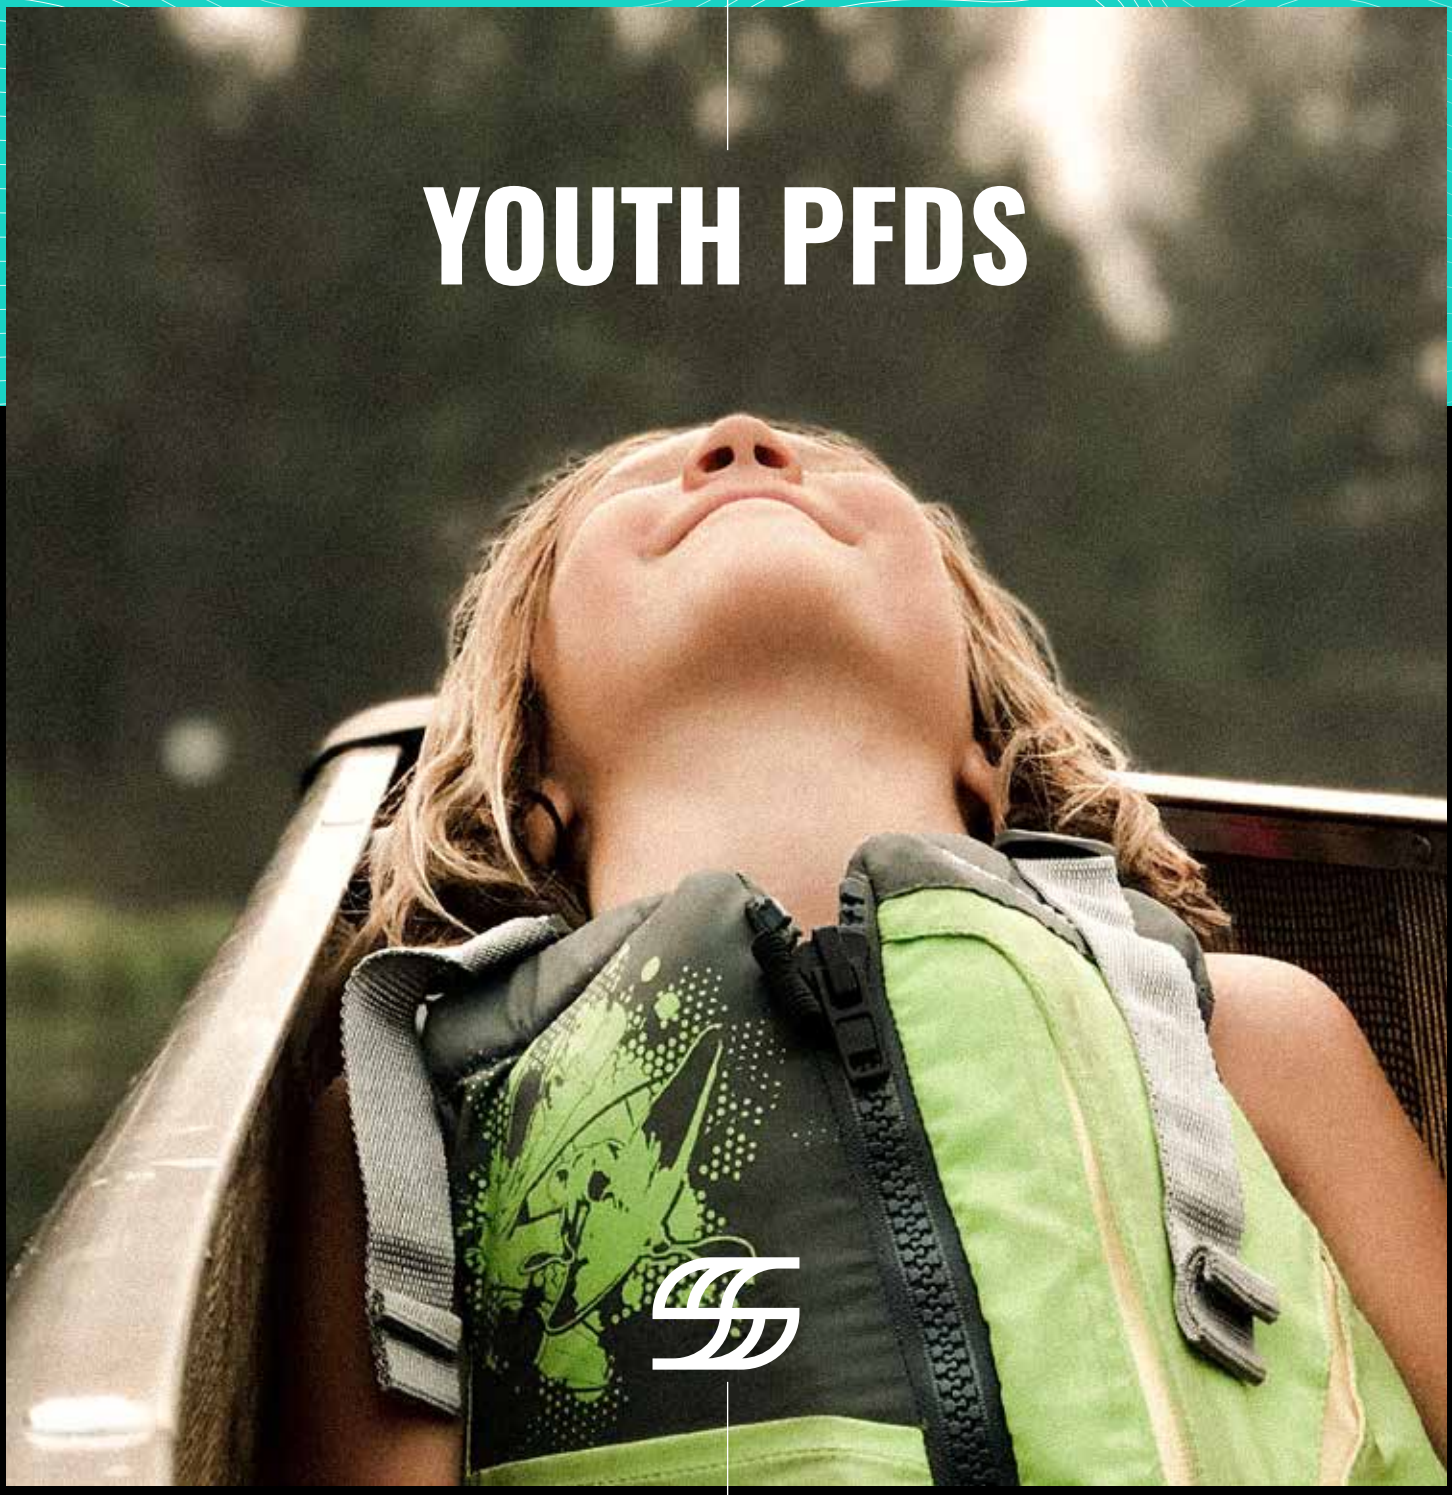

The Pup-Right™ chest panel places more flotation under the dog's chest; this provides a safer swimming position by keeping the dog's snout clear of the water.

TIDELINE

ergo

Ergonomically Shaped Footbed

Traditional symmetric footbed squeezes toes and feet.

FEATURES:

The Tideline features a 5mm neoprene upper, heavy-duty zipper, and a gusseted zipper opening which helps to reduce water exchange.

The thick rubber outsole features a proprietary Stohlquist tread pattern for outstanding traction. The ergonomic shape, which echoes the natural shape of the foot, allows for the best possible fit and comfort in a paddling boot.

The Ergo™ shape also helps to increase the overall warmth of the boot, by contouring the foot and minimizing water pockets.

- 5mm standard neoprene upper
- Vulcanized rubber outsole
- Non-corrosive #10 YKK zipper with zipper lock
- Rubber toe and heel caps for added protection
- Packaged in PVC-free Ziploc poly bag

SQUEEZE LOCK

The Squeeze Lock knife's 3" blade securely locks into the sheath with our patented locking mechanism (Patent #5,926,959).

An easy squeeze of the handle releases the knife. Multiple mounting options and compact size make the Squeeze Lock the knife of choice among boaters.

- 3" blade, overall length 6.5"
- 304 series stainless steel

PEACE OF MIND

WARRANTY INFORMATION

Stohlquist Limited Lifetime Warranty

Stohlquist products are warranted to the original purchaser for the reasonable lifetime of the product against manufacturing defects and workmanship. Stohlquist is not responsible for products that are abused or show normal wear and tear over time. Please see care instructions for the product you are purchasing so as to maximize the life of the product.

THINGS THAT VOID A WARRANTY

- Damages caused by repairs made at an unauthorized repair shop.
- Products classified as "used" or "second" (sold with defects).
- Products used in commercial operations, rental programs, and instructional programs.
- Fit issues that arise after a product has been used.
- Purchases/shipments made outside the USA & Canada.

WARRANTY PROCEDURE

A return authorization is required for all warranty or repair items. Please follow the below steps when seeking return authorization.

1. Contact Stohlquist Customer Service prior to sending in all warranty or repair items.
2. If possible, email a photo of the warranty item in question, along with information on the date of purchase, and the label that is printed on the product.
3. This information will help to speed up the warranty process.

* Note that freight costs will be paid by Stohlquist within the USA only.
